DEWA presents its monthly production report, for Bengalon Coal Mining Project in East Kalimantan (BCP), Asam Asam Coal Mining Project in South Kalimantan (ACP) and Satui Coal Mining Project in South Kalimantan (STC), for the period ending December 31, 2020.

PRODUCTION HIGHLIGHTS

- In December 2020, DEWA’s production performance indicated a slight dip in both overburden removal and coal delivery following the onset of seasonal changes to rainy/wet period. The increasing weather delays amplify other operational interruptions such as slippery, haul road maintenance and muddy material thus resulted in lower overall productivity across all site.
- In accordance with strict covid-19 protocols employed by DEWA, there was a rigorous testing held at all site to control and mitigate the risk of covid-19 spread. This urgent action also adds minor work hour delay in December.
- Company’s overburden removal recorded at 7.86 million bcm, or 5.58% lower than November 2020.
- Following the overburden removal, DEWA’s coal delivery in December 2020 was 1.04 million tonnes, also lower than November 2020. Despite the downtrend, Satui coal mine could increase the amount of its coal production.
- For the FY 2020, DEWA’s overburden removal 111.60 million bcm. Meanwhile, the coal delivery 16.49 million tonnes.
- Mining strip ratio for BCP was 9.83, ACP was 3.70 and STC was 10.06.
